Gonzalo Gomez
Full-stack Developer

gonzalogdv@gmail.com   Cell +54 2616084535   Mendoza - Argentina.

LinkedIn - GitHub - Portfolio

I am a Full-stack Developer, graduated from Henry Bootcamp. There, I developed a personal project and a team project. For front end, I have been using React and Redux libraries, and for back end, Node.js and Express frameworks.
I have long experience of working in professional teams as a leader as well as a collaborator, where I enjoyed joining forces to solve problems.
I like meeting people from different countries and speaking English. I have always been interested in technology. I would love to work in a company where I could apply my knowledge and skills to solve new challenges.

SKILLS

HTML, CSS, JavaScript, React, Redux, Node.js, Express, PostgreSQL, Sequelize and Scrum.

PROJECTS

Full-stack Developer - Codebug   June 2022 – July 2022
Henry Bootcamp, Argentina.

- Design and develop an App as a team project. Codebug provides a space for questions and answers among programming students.
- Technologies: JavaScript, React, Redux, CSS, Material-ui, Bootstrap, Node.js, Express, PostgreSQL and Sequelize.
- Working environment simulation using Scrum methodology and GitHub workflow.

Full-stack Developer - Dogs App   May 2022 – June 2022
Henry Bootcamp, Argentina.

- Designed and developed an App about dog breeds. Technologies: JavaScript, React, Redux, plain CSS, HTML, Node.js, Express, PostgreSQL and Sequelize.
- Dogs App consists in searching, filtering, and ordering existing dog breeds. It also allows visitors to create new breeds.
